

RULES CHEAT SHEET

CORE MECHANIC

ROLL D616

6 1 6

Three six-sided dice: two white, one red (the Marvel die). 1 on the Marvel die (or *M*) equals 6 and is a **Fantastic Roll**. Add each roll result to your Ability Score and compare to the Target Number (TN). **Meets or beats** is a success.

FANTASTIC SUCCESS

3 M 5

1 on the Marvel die that meets or beats the Target Number (TN) is a Fantastic Success: success with an extra-special bonus (the “**Yes, and**” result). Attacks usually do double damage. Character might get an *edge* on their next action, Narrator picks a **situational bonus**, or just suggest something to the Narrator.

FANTASTIC FAILURE

1 M 1

Failure but there’s a bonus or opportunity (the “**No, but**” result). Character might fail forward or realize a **surprising twist**. Was their info wrong all along?

ULTIMATE FANTASTIC

6 M 6

The greatest roll in the game is 6 *M* 6 (**18 + Ability score**) and yields an **automatic success**, no matter the TN. They also ignore *trouble*. And don’t forget the Fantastic added bonus.

KARMA

You can spend 1 **Karma** anytime to:

- Gain an *edge* on an action check (and storytell a hidden advantage).
- Give an enemy *trouble* on a check that involves your character (and explain why).
- Make a Resilience check (vs. TN 10). On success, multiply the Marvel die by your Rank. Recover that much **Health** to your max.
- Make a Vigilance check (vs. TN 10). On success, multiply the Marvel die by your Rank. Recover that much **Focus** to your max.
- Make either recovery action, but for an unconscious or demoralized ally. Use your own ability scores but they take the heal.

Only spend 1 Karma per check.

Heroes start with their Rank in Karma and can be awarded more Karma for: role-playing exceptionally well, giving a great speech, using their catch-phrase perfectly, helping/rescuing someone, or having a weakness/challenging trait come into play.

Each **night’s sleep**: recover to your Rank in Karma.

EDGE

After the roll, **reroll any one die** and use the higher. *Edges might stack (Double Edge) or may not.*

Edge and Trouble cancel each other out.

TROUBLE

Can be added anytime there’s bad circumstances. After the roll, **reroll the highest die** (even if it’s the *M*) and take the lower.

ABILITY SCORES

Standard human-level abilities ranges from -3 to +3 (the limit of human ability).

MELEE

Melee damage. Determines physical traits like strength, punching, grabs.

AGILITY

Acrobatics, speed, dodging, shooting at a distance. **Run speed** starts at 5, +1 for every 5 Agility. +1 for Big trait. -1 for Small trait. **Climb, Jump, and Swim** speeds equal ½ Run Speed.

RESILIENCE

Durability, pain tolerance, and facing extreme conditions. Resilience x 30 is max **Health** (minimum 10 Health).

VIGILANCE

Awareness, senses, defense against sudden ambush. Vigilance is your **Initiative mod**. Vigilance x 30 is max **Focus** (minimum 10 Focus).

EGO

Magic and elemental power checks. Also checks for persuading, intimidating, charisma, mental defense.

LOGIC

Telepathy. Inventing, puzzles, complex machines, defending against being confused, or befuddled, or tricked.

COMMON TN’S

Adjective	Character’s Rank
Trivial	+4
Easy	+6
Routine	+8
Challenging	+10
Difficult	+12
Ridiculous	+14
Absurd	+16

TAKING DAMAGE

PHYSICAL

Attacks the character’s **Health**.

MENTAL

Attacks the character’s **Focus**.

UNCONSCIOUS

If Health reaches zero: All concentrations end. Defense for ranged attacks is 10. Close attacks automatically hit. If Health reaches negative value of (max Health): the character dies.

DEMORALIZED

If Focus reaches reaches zero: All concentrations end. *Trouble* on all actions. If Focus reaches the negative value equal to (max Focus), they are *shattered*: frozen by fear or stress.

CALCULATING DAMAGE

dMarvel x (Rank + Powers) + Score

The Marvel die roll of a character’s check is multiplied by: their rank plus any damage-raising powers. Then the ability score itself is added at the very end. The powers which raise damage multiplier are: Accuracy 1-4, Brilliance 1-4, Discipline 1-4, and Mighty 1-4.

DAMAGE REDUCTION

If someone has Damage Reduction, don’t calculate the total damage yet. **Reduce the damage multiplier** by the number of damage reduction. If the multiplier reaches **zero**, the attack does no damage at all. Do this before adding Fantastic damage increases.

ON YOUR CHARACTER'S TURN...

HEALING

Regain Health/Focus equal to your rank for every hour of calm (2x during sleep).

YOU GET...

- **One Standard Action**
At right. Can be taken before, during, or after movement.
- **One Reaction (per round)**
At far right. Can be triggered by lots of factors. Interrupts turn order only temporarily.
- **One Movement Action**
Travel up to their listed speed for that movement type (run, swim, climb, jump horizontally, fly, etc).
- **Things that take no action** include: speaking, reloading, reading, senses, opening a door, picking something up, or using other simple items. It becomes an action if it requires a check.
- **You can concentrate** on (your rank) number of powers at once.

YOU CAN ALSO

- **Hold your Turn** when it would usually come. If so, pick a new initiative number or specify when to act later. This becomes your new place in the initiative order for this battle.
- **Reserve your Action** (standard or movement) and use your reaction to take it later. State what the action is (at right) and what conditions will trigger it. Once triggered, it happens.

TEAM MANEUVERS

Team chooses at the start of the adventure (can be switched once per day). It can be done **once per battle**: announce the maneuver and **pay 10 Focus**. The Rank 3-4 maneuvers are:

OFFENSIVE: Team members reroll all dice on any attacks this round.

DEFENSIVE: Team members all have Damage Reduction 4 this round.

RALLY: Each team members can make a recovery move (Health or Focus) as if they spent 1 Karma.

STANDARD ACTIONS

ATTACK

Close: Melee check vs. Melee def
Ranged: Agility check vs. Agility def

DODGE

Any attacks against character have *trouble* until characters next turn.

ESCAPE

Melee check vs. grabber's Melee def to break open pins/grabs.

GRAB

As close attack: but on Success, target is grabbed; on Fantastic Success, target is also pinned (*trouble* on Melee/Agility checks).

HELP

Describe how you help an target character. Target character gets an *edge* on their next action.

MOVE

Move double your speed this turn.

USE A POWER

Standard action powers will tell you what to do in their description.

SPECIAL MOVEMENT

CARRYING/LIFTING

May take successful Challenging Melee check. Carrying something their own size cuts speed in half.

DIFFICULT TERRAIN

Each space costs 2 spaces each. If flying above or similar, ignore it.

GLIDING

Move Glide Speed. At end of turn, you lose altitude of ½ Glide speed.

SNEAKING

Cuts speed in half. Observers must make a Vigilance check vs. Agility defense. Success means spotted.

WHILE PRONE

You are on the ground. While crawling, each space costs 2 spaces. Standing up costs 1 space.

REACTIONS

ESCAPE

Trigger: Grabbed, pinned or paralyzed.
Effect: Attempt to Escape as left.

FASTBALL SPECIAL

Trigger: An ally throws character at an enemy and succeeds at Agility check.
Effect: Make a close attack at that enemy. On Success, double damage. On Fantastic Success, triple damage.

HELP TEAMMATE

Trigger: Nearby ally fails a check.
Effect: Give them an *edge* on check.

INTERPOSE

Trigger: Someone in character's reach is targeted by an attack (that doesn't also target this character).
Effect: Jump to between target and attacker; and become the new target of the attack. Attack's TN is the lower of your two defenses.

RAM

Trigger: Character moves full speed at target, then uses standard action to Move (at left) and reaches the target.
Effect: Make a close attack at enemy. On Success, character takes full damage and enemy takes double. On Fantastic Success, character takes full and enemy takes triple and *prone*.

RELEASE

Trigger: Something/someone they're holding moves or attacks.
Effect: Let go.

SKULK

Trigger: Character is target of an attack and someone in reach isn't.
Effect: Hide behind nearby character and they become target of the attack. Attack's TN is the lower of your two defenses.

USE A POWER

Reaction powers will tell you what to do in their description.
